a tamagotchi that is made to resemble my friend. It includes an XIAO-ESP32-C6 as the 🧠, along with 4 buttons (for selecting eat , sleep, play (climb a mountain), a rotary encoder (for WILDCARD, where the user can gamble their pets happiness!), a 0.96" OLED display (for displaying the the pet: luna) and a buzzer (for which mode is selected).

a tamagotchi luna
